## Course details

## Notes to competitors

There will be marshals at all junctions there will also be signs pointing the route, but usual rules apply, Marshals will only be pointing the way not stopping traffic, some of the roads are narrow and twisty remember this is not the tour de France and the roads are open to public and farmer types. It might be an idea to know the course prior to racing it to save any confusion on some of the twisty sections.

**Lapped riders**, this is possible on a small course, any lapped rider must NOT interfere with the race, Lapped riders will finish and be given a credited time once the main bunch has finished, if lapped by the main field you can't finish the full race distance, a credited time will be given based on the last rider to complete the full race distance

## Service

There will be two service cars, usual rules apply to servicing Odd numbers Rear Even Front, Any loss or damage must be settled between riders its is not the service cars responsibility to account for any missing or damaged wheels.
